

Copy-paste this link into your browser if the link did not work from AGMath.com:

<http://education.ti.com/educationportal/downloadcenter/SoftwareDetail.do?website=US&tabId=1&appId=177>

1. Click TI-83 Plus SDK at the top and **Save File**.
2. Run the setup to **Install** the "TI-83 Flash Debugger" onto your PC.
3. You will need to **Restart** your computer.
4. Open the program, probably by double-clicking the shortcut that was placed on your desktop.
5. Once you have the program open, click **File/New** and choose a calculator (you probably want the TI-83 Plus).
6. Click **Debug/Go** and the calculator will appear on your screen and work exactly like the one we have at school.
